Golden Sunshine Corn

This new Sweet Corn is the earliest yellow variety we know of; ten days earlier than Golden Bantam. The ears are 6 inches long, filled with tender, juicy and sweet kernels, set closely together in 12 rows instead of 8 as in the Golden Bantam. For the earliest yellow sweet corn this is the variety we recommend. We are sure you will like it. Pkg. 15c; ½ lb. 35c; lb. 60c; 2 lbs. \$1.00.

Golden Sunshine

20-Day Red Radish

Quick growing, crisp, tender and mild, bright red Radish. A splendid kind for your garden. You will appreciate their unusual flavor and their most attractive appearance. 20 Day and Vick's Scarlet Globe we consider the two best all red varieties for out door growing or for forcing under glass. Pkg. 10c; oz. 15c; ¼ lb. 35c; lb. \$1.35.

Table Queen Squash

This new winter Squash is just about the size of a coconut, thin skinned, yet a splendid winter keeper, orange colored flesh, thick, sweet and mealy. An exceptionally good kind for the small family, half a squash being ample for one person. Pkg. 10c; oz. 25c.

H. & V. Deltus Cucumber

A very long fruit of uniform diameter and dark green skin, whose flesh is unusually crisp, tender and of extra fine flavor. Those who have grown Deltus in their gardens usually prefer it to any other kind. Pkg. 10c; oz. 30c; ¼ lb. 85c.

Oshkosh Pepper

Deep green, large, smooth, thick, sweet meated, this new pepper has some very fine qualities. It's the mildest, sweetest pepper we know of. If you let it stay on the plant until it is mature it turns yellow. Pkg. 15c.

Golden Bantam Sweet Corn

Golden Bantam has a flavor all its own, richer and sweeter than any other corn. Although many other kinds of yellow sweet corn have been offered, it still remains by far the most popular variety, both in the Home Garden and on the market. Sow Golden Bantam at the same time you put in the new yellow sweet corn, Golden Sunshine. It ripens ten days later and will give you corn on your table for a long season. Our special strain of Golden Bantam is unusually good. We are very particular as to its quality. Pkg. 10c; ½ lb. 25c; lb. 40c; 2 lbs. 70c; 10 lbs. \$2.50.

Chinese Cabbage

Cut into quarters and boiled with a meat or alone, its mild, rich flavor and tenderness put it far ahead of Cabbage. Sliced thinly and served cold with a cream dressing, it makes a most appetizing cold slaw. Served with broiled sliced bacon and a hot meat gravy poured over it, it is very good. Boiled, fried, baked with cheese, any way you have a mind to cook or serve Chinese Cabbage you will find it delicious. There won't be any tough outside leaves to it, for it's practically all heart, tender crisp and juicy. It's very easily grown. Sow the seed in July in rows 15 inches apart and thin the same as Lettuce. We have tried all varieties of Chinese Cabbage and there are none that can equal this variety we offer. Pkg. 10c; ½ oz. 25c; oz. 40c; ¼ lb. \$1.25.

Prizehead Lettuce

"I want some more of that Lettuce with the brown edge. Grew it last season and it was great." We hear this many times every day in our seed store during the spring. Prizehead is the Lettuce they ask for and it is one of the finest loose-leaf kinds for your garden, tender, crisp and sweet. Pkg. 10c; oz. 20c; ¼ lb. 50c.

Improved Crosby Beet

We consider this the best early Beet for either the garden or the market. In this improved strain you will find the bulbs grow round in shape, and both the skin and flesh very deep red in color. This is the beet to grow for an early crop. It is a really splendid Home Garden variety. Pkg. 10c; oz. 15c; ¼ lb. 40c; lb. \$1.40.

Golden Acre Cabbage

The small heads, 5 and 6 inches in diameter, are very solid, mature extremely early, are of splendid quality and best of all can be set as close as 8 inches apart, which saves a lot of room in the garden. We recommend this new Cabbage to every home gardener, for it fills a long felt want in the list of good garden vegetables. Pkg. 10c; ½ oz. 35c; oz. 60c.

New Marglobe Tomato

The Garden

Huckleberry

These Pie Berries grow big, strong plants that bear quantities of fruit the same season that you sow the seed. Some call them Sun Berries, others Wonder Berries. Down in Wayne County, N. Y., where we saw them first, they call them Seed Huckleberries, first because they grow and bear from seed the first year and Huckleberries for the reason that pies made from them rival the most delicious Huckleberry pies that you ever tasted. These pie berries are not a freak; they are just a mighty good garden fruit. Package of 50 seeds, 15c; 2 pkgs. for 25c.

A Pet Department has been recently added to our Seed Store. Visitors find it very interesting.

HOME-GARDEN VEGETABLES

The varieties of vegetables listed in this Book are those which have proven to be the best for Home Garden use in the gardens of our customers and in our own trial grounds. We have underscored those kinds that we especially recommend to you.

Mary Washington Asparagus

ASPARAGUS ROOTS

The popularity of Asparagus in the Home Garden is growing rapidly, as people learn how easily it may be raised, and how much better the flavor is when cooked immediately after cutting. Asparagus begins to lose flavor 20 minutes after being taken from the ground. A small bed 12 ft. wide and 25 ft. long will hold 100 plants and yield sufficient asparagus for the family of ordinary size.

Culture. Dig a trench 18 in. deep and a foot wide and put in 4 inches of rotted manure packed down firmly. Put in 5 in. of good rich soil on top of this and lay the plants in 18 in. apart, spreading the roots and keeping the crown upright. Cover with soil to within 4 in. of the surface and as the plants grow cover gradually. The rows should be about 18 in. apart.

Mary Washington Asparagus. This new variety is the very finest for the home garden or to grow for market. It is the best of the Washington strains, which were all developed by Dr. J. B. Norton, for many years a Government plant-breeder. At last we have not only a rust proof variety but an asparagus that is very fast growing, exceedingly tender, of excellent flavor and that produces heavy stalks 1" to 2" in diameter. This variety is larger and earlier than Pedigreed Washington and the stalks are slightly oval in form.

Selected Roots. 50c a doz.; \$1.75 for 100; \$15.00 for 1000. (Parcel Post add 5c for each 25 roots.)

Asparagus Seed

One ounce will make 200 plants, 5 lbs. will sow an acre

Seed Growing. Soak the seed in warm water for 24 hours, then sow an inch deep in rows a foot apart. The following spring set the best of the plants in the permanent bed.

Mary Washington. The best Home Garden kind. Pkg. 15c; oz. 30c; ¼ lb. \$1.00; lb. \$3.75.

Vick's Mammoth. A heavy green stalked variety. Pkg. 10c; oz. 15c; ¼ lb. 30c; lb. \$1.00.

Asparagus Knives, 60c, postpaid. Asparagus tape, red, 1000 yds., \$5.50. Raffia, for tying, 35c a lb., postpaid. Asparagus salt, per 100 lbs., \$2.00. Asparagus Culture, a book you need on growing, marketing and canning, \$1.00.

ARTICHOKE

One package will make 100 plants, one ounce will sow 100 feet, 5 pounds to the acre

A perennial producing flower buds which are used for food the second year after sowing the seed. Requires winter protection in the North. Sow seeds early in the spring. If sown in hot beds in February can be grown to bud in the first year.

Large Green Globe. The standard variety. Large package, 10c; oz. 80c; ¼ lb. \$2.90.

BRUSSELS SPROUTS

One package will make 200 plants, one ounce will sow 200 feet and produce 3000 plants

The small heads, resembling cabbage, are formed along the stalk. Prepare like cabbage or in cream, like cauliflower. Sow seed in spring; transplant and cultivate same as cabbage, except leaves should be broken down in fall, giving heads more room to grow. Freezing improves the quality of the sprouts. They may be left in the ground, here in the North until December.

Paris Market. Half dwarf; very fine, good-sized heads. Pkg. 10c; oz. 40c; ¼ lb. \$1.25.

Long Island Improved. (Special Strain.) A very fine strain grown extensively for the New York market. The plants produce a large crop of very solid heads of sweet and delicious flavor. Pkg. 15c; oz. 40c; ¼ lb. \$1.25.

BROCCOLI

One ounce will make about 1500 plants

A vegetable very similar to cauliflower but less delicate in flavor. Hardy, thrives best in cool weather and should be hoed and watered frequently. Broccoli is used in Northern climates where cauliflower does not do well. Sow the seed inside or in coldframes in January or February and set out plants when ground is warm. Cultivate the same as cauliflower.

White Cape. Large, solid creamy-white heads of good flavor. Pkg. 10c; oz. 50c.

Purple Cape. Large, solid purplish heads, cooks green. Pkg. 10c; oz. 50c.

TABLE BEETS

One package will sow 15 ft. of row, 1 oz. 50 ft., 5 to 6 lbs. to the acre

The best results are obtained on a deep, rich sandy loam. Sow seed 1 inch deep, in drills 16 inches apart, as early as possible. If wanted very early, sow Detroit Dark Red and Crosby's Egyptian in hotbeds and transplant to open ground. Thin to stand 3 or 4 inches apart. Cultivate cleanly and thoroughly. For succession, sow at intervals until middle of July.

Early Crosby's Egyptian. Our special strain of this popular variety is better in many respects than the old one. Globular in shape, perfectly smooth, has a short top, small tap-root, and both skin and flesh are dark in color. Much earlier than all other dark-fleshed varieties. The very best early Beet for home or market garden. Pkg. 10c; oz. 15c; ¼ lb. 40c; lb. \$1.40.

The Beets are round, smooth, and very dark red in skin and flesh. In tenderness and sweetness they are unsurpassed. Fine for canning. Pkg. 10c; oz. 15c; ¼ lb. 40c; lb. \$1.40.

Early Wonder. For those who want the very earliest Beet, this variety should be planted. The tops are medium short and the Beet is round with skin and flesh lighter than Detroit. Pkg. 10c; oz. 15c; ¼ lb. 40c; lb. \$1.40.

MANGELS AND SUGAR BEETS

There is no crop more valuable for feeding cattle and sheep than mangels and sugar beets. In these last few years it's hard to find a dairyman who does not feed them. 45 tons to the acre is the average yield, they are easily harvested, not a particle of waste to them, and may be stored in pits and root cellar with little trouble. Sow 8 lbs. to the acre in May or June in drills 2 ft. apart, and thin to 10" in the row.

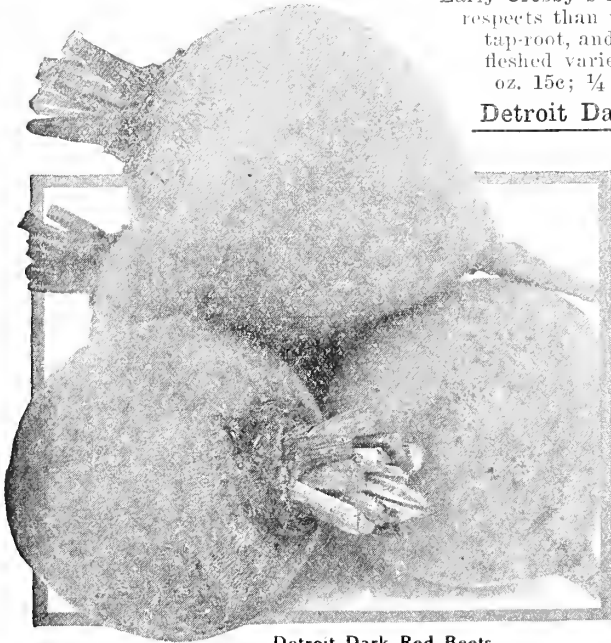

Golden Giant.

Many dairymen claim this is the greatest yielder of them all. Giants in size, not as long as Long Red but larger round; grows two-thirds above ground, skin yellow, flesh white and solid. A fine kind for shallow soils. Oz. 10c; ¼ lb. 20c; lb. 65c; 10 lbs. \$6.00.

Chinese or Celery Cabbage

Do not confuse our Chinese Cabbage with the ordinary kind offered for sale. As in other vegetables, there are many varieties of Chinese Cabbage, or Pe Tsai, as it is sometimes called. Some are loose-leaf growing, like Cos lettuce, others form heads like cabbage, head lettuce, celery, etc. To determine which variety was the best for both home garden and market, one of Irondequoit's leading gardeners made thorough tests of each kind. These showed one variety to be far superior to all others. Its long, oval shaped, eight or nine pound perfectly formed heads were solidly packed with cream white, tender, crisp and delicious leaves. Creamed like cauliflower, celery or ordinary cabbage it is delicious. For salads and cold-slaw it cannot be beaten. You should have some in your garden. Be sure and sow Paoting, not ordinary Chinese Cabbage, which is called Pe Tsai. Pkg. 10c; oz. 40c; ¼ lb. \$1.25.

Cultivate thoroughly until runners make this impossible. If plants are attacked by beetles, spray with Pyrox or arsenate of lead. Always wash fruits thoroughly before eating when these sprays are used. If foliage is attacked underneath, spray with Black-Leaf 40.

GOOD GARDEN PEAS

Fresh, young, sweet Green Peas grown right in your own garden, cooked and served an hour or two after they have been picked, make one of our most delicious vegetables that you may have on your table for a long season by planting a proper selection of varieties that mature in succession. The very early, smooth peas can be sown while some frost is in the ground. They bear very early, but are not as sweet as the wrinkled kinds. Sow the wrinkled varieties when the ground is warm. Plant peas in trenches that are three or four inches deep and 2 feet apart, covering seed with an inch of soil. Tall varieties should be kept from trailing on the ground by supports. This is a little more trouble than in growing the dwarf kinds, but you will get more peas from them. Pinch back the tips of the runners of the tall kinds; it makes a heavier crop.

HART & VICK'S RADISH

One package of seed will sow a 15 foot row, one ounce 60 feet

This is another vegetable that loses about half its flavor if you don't eat within a very short time after it is taken from the ground. Radishes wilt, like flowers and other vegetables, and lose their fresh crispness and juicy, delicate flavor. You can't know how really good radishes are if you haven't gone out in the garden in the early morning and pulled a few for your breakfast.

For forcing, sow in hotbed or under glass in rich, sandy loam. Scatter 50 to 100 seeds to the foot and cover with $\frac{1}{2}$ inch of soil sifted on. Sow in garden, as early as possible, in rows about 12 inches apart and thin to prevent crowding. A good dressing of nitrate of soda will greatly help their growth and make them tender and crisp. Successive sowings every week or 10 days will keep your table well supplied the entire season.

Sow in May and every two weeks. Those which crop in October should be stored in sand for use in winter.

Many of the finest lawns in the country were made with Highland Park Lawn Grass Seed. It has a splendid reputation for quality.

To have a lawn quickly sow Highland Park Grass Seed at the rate of one pound for every 200 sq. ft. of lawn to be made.

GRASS SEED FOR YOUR LAWN

When you buy grass seed for your lawn be very particular about its quality. Poor seed is very expensive. It gets weeds in your lawn that cost a lot of hard work to get out. In our Lawn Grass Mixtures you will find only the finest re-cleaned seed. No dirt nor chaff, just plump, clean seed that will grow and make you an unusually fine lawn.

Highland Park Mixture

This mixture has proven its worth by producing beautiful and permanent lawns for the city home, country estate and public park. It is a careful blending of varieties of short, fine-leaved grasses and a correct percentage of pure white clover, and will make a thick, deep-rooted, velvety evergreen sod that will hold the moisture and remain fresh and green during the dry season in summer. Sow at rate of one pound to each 200 sq. ft. For renewing old lawns use half this amount. Price per lb. 50c; 3 lbs. \$1.40; 5 lbs. \$2.25; 10 lbs. \$4.25; 20 lbs. (1 bushel) \$8.00. Add 5c per pound if we are to prepay Parcel Post or Express Charges.

Putting Green Mixture

A combination of imported and domestic grasses carefully chosen for their fineness of leaf blade and for their low growing qualities. This mixture will make an absolutely smooth turf of velvet-like texture, so necessary for the perfect putting or bowling green, tennis court or base ball field. This superfine mixture is also growing very popular for the making of very fine lawns. Price per lb. \$1.00; 3 lbs. \$2.70; 5 lbs. \$4.35; 10 lbs. \$8.50; 25 lbs. \$20.00; 100 lbs. \$75.00. Add 5c per pound if we are to prepay Parcel Post or Express Charges.

Shady Nook Mixture

On many lawns there are unsightly bare spots under trees and between adjoining houses where it is impossible to get the ordinary lawn grasses to grow. This mixture is made up of short-growing, fine-leaved grasses that will give you an evergreen sod in the most densely shaded spots. Often the soil is sour and moss grown in such places and should be treated with lime, 50 lbs. to the 1000 sq. ft. Price of Shady Nook Mixture, per lb. 60c; 3 lbs. \$1.70; 5 lbs. \$2.65; 10 lbs. \$5.00; 20 lbs. \$9.50. Add 5c per pound if we are to prepay Parcel Post or Express Charges.

Terrace Grass Mixture

Banks and terraces need deep rooting, very hardy grasses to hold them in place. In this special mixture we have combined varieties of very strong-rooted grasses that will not only quickly form a thick, matted sod that will keep the bank from washing out in heavy rains, but one that will remain fresh and green all season. We recommend sowing grass seed for terraces at the rate of one pound to each 200 sq. ft. Price per lb. 50c; 3 lbs. \$1.40; 5 lbs. \$2.25; 10 lbs. \$4.25; 20 lbs. \$8.00. Add 5c per pound if we are to prepay Parcel Post or Express Charges.

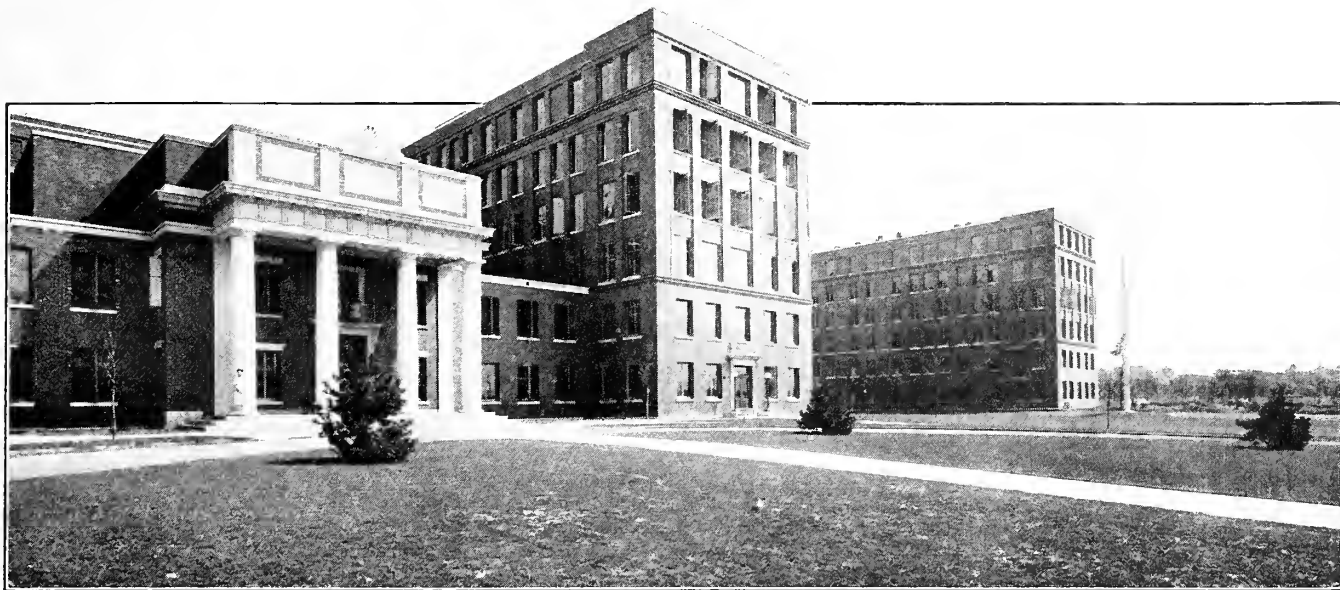

"Your Highland Park Grass Seed cannot be praised too highly. After using it, on a lawn that was practically bare, I now have one of the finest velvety lawns that could be wished for. I have recommended Highland Park Grass Seed to all of my friends. Your best advertisement would be a look at my lawn."
FRANK A. SCHALK, Richmond, Indiana.

Terrace Grass Seed quickly forms a deep rooted turf and holds the bank in place.

The lawns about the Strong Memorial Hospital and School of Medicine, University of Rochester, were made with Highland Park Lawn Grass Seed.

New and Specially Good Garden Flowers

The New Blue Perennial Poppy

This beautiful new Poppy from China will soon become one of our most popular perennial plants. Its 2 to 3 foot sturdy stems, covered with broad sea-green leaves, bear at their tops large, four-petalled blooms of a glorious sky-blue color, the effect being enhanced by a central zone of golden yellow anthers. This superb new plant has been accorded an Award of Merit by the Royal Horticultural Society. It well deserves a place in your perennial garden. Seed pkg. 50c.

"Evening Star" Calliopsis

Few plants show richer and more brilliant colors than this Calliopsis. The plants are densely covered with large bright yellow flowers with a zone of deep scarlet, the petals being curved so as to form an eight pointed star. No plant can exceed in richness of effect a border of this fine variety with its close growing heads of bloom in its gorgeous tints and colors. Seed pkg. 25c; 5 pkgs. \$1.00.

"Exquisite"—Hollyhock

The flowers of this splendid new Hollyhock are very large, measuring 4 to 5 inches across, and possess the charming new feature that every petal, both around the circumference and in the center, is exquisitely curled and fringed. The flowers are extremely double, resembling the large double fringed Petunia. Each white marginal petal is adorned with a large blotch. The mixture includes Rose, Light Rose, Carmine, Violet and Dark Purple. Pkg. 25c.

An English Salvia

A leading seed grower in England sends us this Early Blooming Salvia which he calls "Harbinger." It produces a profusion of long spikes of dazzling bright scarlet flowers early in July and keeps on blooming until hard frost cuts it down. The plants are very compact growing and covered with strong dark green foliage that forms a very effective background to the vivid color of the flowers. Seed pkg. 25c.

Evening Star Calliopsis

A Dwarf Cosmos—"Fairy Queen"

The Cosmos has been regarded by some people as a rather ungainly plant that blooms sparsely in proportion to its bulk, but this cannot be said against this remarkable new variety we offer here. The sturdy, bushy plants seldom exceed 2½ feet in height, are of very compact habit, and covered with large flowers of bright carmine-rose from early July until frost. Seed pkg. 25c each; 5 for \$1.00.

"Snow White"—Gypsophila

A serious drawback to the usefulness of the popular Double Perennial Gypsophila has hitherto been that it is not really a pure white. After a number of years of selection this strain is introduced whose flowers are absolutely pure white and produces a larger percentage of double flowers than the old Hardy Gypsophila. Seed pkg. 25c each; 5 for \$1.00.

Heavenly Blue Morning Glory

This wonderful blue Morning Glory has attracted so much attention and has been so greatly admired by many people, that we call your attention to it in these pages of Specially Good Flowers. The vines make a growth of 15 feet or more, are covered with splendid light green foliage and show from July until frost masses of pure sky-blue flowers delicately shading to white in the center. Seed pkg. 10c.

Royal Bouquet Verbena

If you have ever grown Verbena yourself or have seen them growing in some friend's garden, you have thought, what a gorgeous bed these brilliantly colored flowers would make if they only grew on strong, upright plants instead of having their carpet-like creeping habit. "The Royal Bouquet" Verbena we are importing from Europe this year has this upright growing habit. It forms a plant 15 to 18 inches high and not more than 10 inches across and holds its giant, brightly colored blossoms perfectly erect. Seed pkg. 25c each.

Orange King Calendula

Here is a very choice strain of this brilliant, free flowering annual which does so well in every garden. The brilliant orange blossoms are much larger, more double and have longer stems than the old variety. This is the kind florists demand for perfect flowers. Pkg. 20c; 2 pkgs. 35c.

The Dwarf Cosmos—"Fairy Queen"

SEEDS OF ANNUAL and PERENNIAL FLOWERS

Our list of Flower seeds does not cover every variety, but it does describe the best kinds for garden planting. We believe that a carefully selected list like this is what the amateur gardener wants. Our seed is the best that can be grown, carefully tested for quality, and with ordinary care will give splendid results. It is of the same high quality we sell the particular florist for greenhouse and outside planting. Annuals are those kinds that you must plant each season. Perennials are hardy and last for years.

Seed sown outdoors in the early spring will nearly always make blooming plants the first season. Fall sown seed makes plants that bloom the next spring and summer.

Seed may be sown in the open ground any time after danger from frost is past, and in a few weeks they are a sheet of bloom, remaining so until frost. They may be used in a variety of ways, such as a carpet to beds of Roses, in boxes, vases, etc.; but it is when grown in masses, in beds or borders, that they show to best advantage.

HART & VICK'S DELPHINIUM

HARDY LARKSPUR PICTURED IN COLORS ON PAGE 35

These are the most popular of all the Hardy Plants for the garden. The tall spikes of lovely blue flowers standing erect above the dark green foliage make a wonderful sight. They begin to bloom in June and by cutting the plants to the ground as the crops of flowers fade, a second and third lot of bloom may be had. The flower stalks are very brittle and should be staked to keep them from being blown over by the wind. Fertilize well around the roots with bone-meal and in the late fall sift coal ashes over the crowns to protect them from grubs. Plant several clumps of these in your garden. **Belladonna.** Freest and most continuous bloomer of all, flowers from the end of June until after frost. Plants 2 to 3 feet high, bearing mammoth spikes of turquoise-blue flowers. 30c each; 80c for 3; \$3.00 for 12.

H. & V. Exhibition Hybrids. As fine a lot of Hybrid Delphiniums as can be found. These plants were grown from seed and saved from the most perfect flowers in a Delphinium collection famous throughout this part of the country. The colors range from deepest of indigos and royal purples, through the mauves, mauve-pinks and lavenders, to the palest and most delicate blues. These Exhibition Hybrids will please the most critical gardener. Plants, 35c each; \$1.00 for 3; \$3.50 for 12.

Plants of the **New Dazzler Gaillardia**, 25c each; 75c for 3; \$1.25 for 6.

HOLLYHOCKS

Stately, majestic, hardy plants from 6 to 8 feet high, which are a necessary part of every old-fashioned garden, and should also find a place interspersed with shrubbery, as clumps on the lawn or in the mixed border, where their colossal spikes of bloom produce bold and showy effects, which cannot be secured with any other flowering plant.

The Hollyhock requires a deeply dug, well-drained soil, enriched with thoroughly decayed manure, and should be liberally supplied with water during dry weather. A slight protection throughout the winter will be beneficial. An occasional spraying with Bordeaux mixture, which should be applied early in the growing season, usually prevents disease, which is prevalent in some localities.

Summer Flowering Bulbs

The bulbs offered on this page include some of our showiest garden flowers. They are of easiest culture; planted in spring in good garden soil, they flower with great certainty during the summer and fall. After the tops have been killed off by frost, all of the bulbs (with the exception of Cinnamon Vine) should be taken up and stored in the cellar over winter.

If the planting season should have become well advanced, those who have neglected to plant flower seeds will find that they may still have sightly flower beds on the lawn or in the garden by planting these bulbs. They also add a dash of color to the hardy border.

The Beautiful Tuberous Rooted Begonia

Caladium Esculentum

Elephant's Ear

This giant plant grows six to ten feet high and bears immense light green leaves three to four feet long and two and one-half feet wide. It is very effective in beds and borders and are used extensively in public parks where their decorative value is greatly appreciated. Plant them outside when the ground is warm in the spring or start them indoors early and transplant outside.

Mammoth size bulbs, 25c each; \$2.50 a doz.; \$20.00 for 100.

Medium size bulbs, 15c each; \$1.50 a doz.; \$11.00 for 100.

Cinnamon Vine

No other vine will cover a trellis, fence or arbor more quickly or satisfactorily than this easily grown climber from China. It will grow from 15 to 30 feet high the first season and higher in succeeding years. The handsome foliage is dark green, thick and glossy, while the racemes of white blossoms emit a delightful cinnamon-like perfume. This vine is perfectly hardy, thriving in all soils, wet or dry, in the sun or shade, and absolutely free from disease, blight or insects. Extra large 2 year old tubers, 20c each; 3 for 50c. Postpaid.

Poppy-Flowered Anemones

These beautiful Anemones embrace such a remarkable range of fine colors that they are very desirable for both garden display and cut flowers. The plants grow 8 to 10 inches tall and produce large, single to double poppy-like flowers. They are perfectly hardy and easily grown, and can be planted in either spring or fall. Set the bulbs 2 to 3 inches deep and 6 inches apart in a fine, well-drained soil. **St. Brigid** (Mixed Colors), 15c each; \$1.00 per dozen; \$7.50 per 100.

Tuberous Rooted Begonias

What a wonderfully beautiful and useful flower so many people are missing when they neglect to grow some of these Tuberous Begonias. Improvements made in recent years have so improved their size, color and texture that we now have flowers from 4 to 6 inches across in colors ranging from the richest crimsons and scarlets, through orange, yellow and delicate pinks down to the purest whites. As outdoor bedding plants for shady places they are unrivaled. In window and porch boxes, in half-shady spots they do wonderfully well. Planted in pots for winter house flowers they are very fine.

They are easily grown. Just start the bulbs indoors during March or April and set out when all danger of frost is past. Set the plants a foot apart and give them plenty of fertilizer and water. In the fall dig, spread out to dry and keep over winter in sand in a cool place.

Golden Yellow Calla Lily

The variety offered below succeeds best when treated in the same manner as gladioli, tuberose and other summer-flowering bulbs. They should be planted in the open border in a dormant condition when danger from frost is over in spring, and will then flower during the summer months. When the tops are killed by frost in the autumn, dig and store through the winter as you would potatoes.

Elliottiana. This is the best of the Yellow Callas, its flowers being as large as the popular white, winter-flowering variety, and of a rich, lustrous golden yellow of velvety texture; the foliage is dark green, with a number of translucent creamy white spots, which add much to its beauty. Maderia Vine

The old favorite "Climbing Mignonette" so much prized on account of its rapid growth and freedom from disease and insects. A splendid vine for covering porches, pergolas, fences, etc., where its thick, heart-shaped, glossy, light green leaves and long hanging stems of feathery, fragrant, white flowers are very effective. A free and constant bloomer. Strong tubers, 15c each; \$1.50 a doz. Postpaid.

HART & VICK'S HARDY GARDEN LILIES

All hardy borders should have some of the various kinds of Lilies scattered through them. Here they do their best, as they get the benefit of the shade of the nearby plants which is so necessary for successful growing. HARDY CLIMBING ROSES

Do not cut back your Climbing Roses in the spring except to take out the dead and old stalks. The time to trim them is just after they are through blooming. Cut out at the base of the plant all the canes that have had flowers on them, this makes room for new canes that will flower the next season.

Climbing American Beauty. The picture we show here of this wonderful rose climbing over and almost hiding this pergola tells you but a small part of its magnificent beauty. The large double cerise pink, fragrant flowers are borne on single stems in the greatest profusion. Over nine hundred blossoms and buds have been counted on one four-year-old bush. Climbing American Beauty can be grown in bush form, as a pillar rose or trained to trellises and arbors. It will grow anywhere.
